Subject: Rhea Rae Mine

Tom,

I have moved the 53' trailer 50 miles to another secured location. Kyle Zahn and I are going to the mine this coming week and taking a large trailer, we have set-up a small work force to remove any trash left by the robbers that have vandalized our site. It appears to have damages in excess of \$ 300,000.00 dollars. We will scrap anything surplus, and dress our surplus equipment.

We also found that a previous stockholder had a trailer full unmarked chemicals that should have never been brought to our location. We have made contact with him with notification to vacate our property ASAP (By This Next Week)

We have been doing lab work and fund raising to go forward and were not on location other wise this results would have not taken place.

This is a little set back to regroup, we will be in compliance shortly. We just renewed our lease, have our reclamation bond increased, we are making good headway. I doubt we will ever catch the thief, but they are working on the investigation from Moab.

I will drop you a note when we return with another up date.

Darrell
